PROJECTS

Ideal Bilar Website LIVE

- Website built for a car showroom handling car sales and rentals, with a scalable, flexible, and animated responsive front end.

Tech: React.js, Ant Design · Vercel: idealbilar-website

Lumyana Website + Admin Dashboard LIVE

- Cosmetics e-commerce platform handling product selling and buying, backed by scalable REST APIs.

Tech: MongoDB, Node.js, Express.js · Vercel: LUMYANA

eBay Inventory Management System LIVE

- Developed an eBay seller dashboard using the MERN stack with OAuth 2.0 and eBay APIs; integrated sales/order data, real-time notifications, and automated daily, weekly, and monthly reports.
- Implemented eBay webhooks and Socket.IO for real-time marketplace event handling.
- Managed API integration, authentication, token handling, and production deployment.

Vercel: EbayProject

Real Estate Web Application LIVE

- Developed a responsive real estate web application with property listings, detailed property views, favorites, tour requests, and property inquiries. Built reusable UI components and integrated admin/property management functionality with backend APIs.

Live: trustfe.com

Admin Dashboard Frontend LIVE

- Developed a responsive admin dashboard frontend for managing and monitoring application data.
- Built reusable UI components with intuitive navigation, tables, forms, and dashboard views.
- Focused on responsive design, clean UI, and a scalable frontend structure.

Vercel: gfpg-six.vercel.app

Point of Sale System (MERN Stack)

- Full-stack POS system built to streamline retail operations.

Tech: React.js, Node.js, Express.js, MongoDB · GitHub: Frontend + Backend

Attendance App (React.js + Node.js)

- Employees can mark daily attendance, apply for leave, register for events, and view monthly attendance history.
- Admins can approve or reject leave requests, create events, and view data across all employees.

Tech: React.js, Tailwind CSS, MongoDB, Node.js, Express.js · GitHub: Frontend + Admin Panel + Backend

Course Registration Website + Admin Panel

- Full-stack course registration system with user authentication and enrollment functionality.
- Admin panel to manage students, courses, and registrations.
- REST APIs built with Node.js and Express, with MongoDB for data management.

GitHub: Frontend + Admin Panel + Backend

Social Media Integration Website

- Platform integrating Facebook Page, Instagram Professional, and YouTube accounts — login, access, and one-click posting across all platforms.

Tech: React.js, Tailwind CSS, MongoDB, Node.js, Express.js, third-party social media APIs · GitHub: Frontend + Backend

EDUCATION

Bachelor of Computer Science
The University of Agriculture, Peshawar

ADDITIONAL INFO

Availability: Full-time, On-site, Remote
